

QURI

OUR IMMUTABLE TREASURE

Project Roadmap

QURI is a newly launched project. This roadmap reflects our honest, current stage and the concrete steps we are taking as we grow.

Network Ethereum
Mainnet

Published July
2026

Phase 1 — Foundation & Launch **COMPLETED**

Every road begins with a first stone laid in the open, where anyone can see it was placed with care. This is ours.

- ◆ Contract deployed on Ethereum Mainnet —
0x5b5F406A5c96b3810e997e299d99E65550806C32
- ◆ Source code verified and published on Etherscan
- ◆ Initial Uniswap V2 liquidity pool created (QURI/WETH)
- ◆ 99% of LP tokens locked for ~5 years via UNCX Network (public, on-chain, verifiable)
- ◆ Website live at quritoken.com

Phase 2 — Community Building IN PROGRESS

Just as the Qhapaq Ñan connected valley to valley, this phase connects Guardian to Guardian — building the network that carries the value we distribute.

- ◆ Grow official social channels (X/Twitter, Telegram, Discord)
- ◆ Publish transparent, ongoing communication about contract activity, burns and reflections
- ◆ Onboard early Guardians and gather community feedback
- ◆ Explain the tokenomics clearly and repeatedly: 1% to ecosystem development, 1% redistributed to Guardians, 1% permanently burned on every trade

Phase 3 — Security & Trust PLANNED

Trust is not declared, it is demonstrated. As the project and its community mature, we commit to strengthening the verifiable guarantees already in place.

- ◆ Commission a formal third-party smart contract audit as the project and liquidity base grow
- ◆ Publish the audit report publicly and share it as a milestone with the community
- ◆ Maintain and extend the liquidity lock as a standing commitment
- ◆ Continue engaging with security partners such as Blockaid to keep the contract's risk classification accurate and up to date

Phase 4 — Growth & Utility

FUTURE

We don't ask you to trust a promise. We ask you to follow the path: it's all in the contract, in plain sight, verifiable block by block.

- ◆ Pursue listings on additional DEX aggregators and tracking platforms
- ◆ Explore CEX listing opportunities once trading history and audit are in place
- ◆ Expand community-driven initiatives around the QURI brand and its Andean-inspired identity
- ◆ Evaluate Guardian-requested features based on community feedback

This roadmap reflects our current plans and may evolve as the project grows. QURI is a self-funded, community-first project — we believe in building transparently, one verifiable step at a time. This document is for informational purposes only and does not constitute financial advice or an investment offer.
